Management philosophy

Our business philosophy is based on service, respect and attention to Customers, swiftness in replying and delivering.

The investment in human and technological resources, allow us to contribute to the realization of an innovative company with the creation of products and services with high added value aimed at achieving excellent quality.

Eurotrol® shares these values with customers and suppliers, in a line of professionalism and transparency.

 Valves

 Pressure vessels

 Cabinets

 Brine tanks

 Membranes

 Membrane Vessels

 UV sterilizers

 Filter housings, cartridges and polyphosphate feeders

 Resins and media

 Residential r.o. components

History

In 2000 Rino Leoni founded the company with the idea of selling components and provide solutions for water treatment. We've grown gradually to become one of the major international players in the distribution of components for water treatment.

In 2013, the entrance into Eurotrol of the second generation of Leoni family has guaranteed to the company a continuity and growth through a wider vision to the new markets.

In 2015, in order to consolidate our leadership in the European market, we have created the brand that mark all products of our creation and production.

Our values have always reflected the direction that still advances our business philosophy: an ethical approach in dealing with our customers and suppliers; spirit of initiative and determination in supplying the best technology.

The long experience in this job allows us to know thoroughly the reality and requirements of the market and to meet our Customer's needs with customized solution too.

Solutions and services

Thanks to the know-how gained over the years and the expertise of its team, **Eurotrol®** will provide you with the best solution to fit your needs.

Eurotrol® products are the result of an intensive research and continuous updating that allow the realization of innovative and reliable.

Eurotrol® does not manufacture complete water treatment systems, this is our Customer's job:
we just sell components and solutions.
