RESIDENTIAL

RO elements for residential use (1.8 inch diameter)

CSM[®]

SPECIFICATIONS:

General Features

Model Name	Permeate Flow Rate GPD (L/day)	Salt Rejection %
RE1810-30	30 (114)	98.0%
RE1810-50	50 (189)	98.0%
RE1812-35	35 (132)	98.0%
RE1812-50	50 (189)	98.0%
RE1812-60	60 (227)	98.0%
RE1812-80	80 (303)	98.0%

1. The stated product performance is based on data taken after 30 minutes of operation at the following test conditions:

- 200 mg/L NaCl solution at 60 psig (0.41 MPa) applied pressure
- 15% recovery
- 77 °F (25 °C)
- pH 6.5–7.0

2. Dry type elements are vacuum leak tested using the San Diego Protocol.

3. Permeate flow rate for each element may vary but will be no more than 15%.

4. Dry elements are packaged in a polyethylene bag

▣ Wet elements are packaged in a polyethylene bag containing SB(4g/L) + HCl(0.5 l/g/L) solution.

Membrane type: Thin-Film Composite
Membrane material: Polyamide (PA)
Element configuration: Spiral-Wound, Tape Wrapping

APPLICATION DATA:

Operating Limits

· Max. Operating Pressure	125 psi (0.86 MPa)
· Max. Feed Flow Rate	2 gpm (0.45 m ³ /hr)
· Max. Operating Temperature	113 °F (45 °C)
· Operating pH Range	2.0–11.0
· Max. Turbidity	1.0 NTU
· Max. SDI (15 min)	5.0
· Max. Chlorine Concentration	< 0.1 mg/L

The information provided in this document is solely for informative purposes. It is the user's responsibility to ensure the appropriate usage of this product. Woongjin Chemical assumes no obligation, liability or damages incurred for the misuse of the product or for the information provided in this document. This document does not express or implies any warranty as to the merchantability or fitness of the products.

GENERAL HANDLING PROCEDURES

- Elements contained in the boxes must be kept dry at room temperature (7–32°C; 40–95°F) and should not be stored in direct sunlight. If the polyethylene bag is damaged, a new preservative solution (sodium bisulfite) must be added and air-tight sealed to prevent drying and biological growth.
- Permeate from the first hour of operation should be discarded to flush out the preservative solution.
- Elements should be immersed in a preservative solution during storage, shipping and system shutdowns to prevent biological growth and freezing. The standard storage solution contains 1% by weight sodium bisulfite or sodium metabisulfite (food grade). For short term storage (i.e. one week or less) 1% by weight sodium metabisulfite solution is adequate for preventing biological growth.
- Keep elements moist at all times after initial wetting.
- Only use chemicals compatible with the membrane elements and components. Use of such chemicals may void the element limited warranty.
- Permeate pressure must always be equal or less than the feed/concentrate pressure. Damage caused by permeate back pressure voids the element limited warranty.

GENERAL HANDLING PROCEDURES

- Elements contained in the boxes must be kept dry at room temperature (7–32°C; 40–95°F) and should not be stored in direct sunlight. If the polyethylene bag is damaged, a new preservative solution (sodium bisulfite) must be added and air-tight sealed to prevent drying and biological growth.
- Permeate from the first hour of operation should be discarded to flush out the preservative solution.
- Elements should be immersed in a preservative solution during storage, shipping and system shutdowns to prevent biological growth and freezing. The standard storage solution contains 1% by weight sodium bisulfite or sodium metabisulfite (food grade). For short term storage (i.e. one week or less) 1% by weight sodium metabisulfite solution is adequate for preventing biological growth.
- Keep elements moist at all times after initial wetting.
- Only use chemicals compatible with the membrane elements and components. Use of such chemicals may void the element limited warranty.
- Permeate pressure must always be equal or less than the feed/concentrate pressure. Damage caused by permeate back pressure voids the element limited warranty.

SPECIFICATIONS:

General Features

Model Name	Permeate Flow Rate GPD (L/day)	Molecular Weight Cut Off
UE1810	200 (757)	100K
UE1812	250 (946)	100K
UE2010	450 (1,703)	100K

1. The stated product performance is based on data taken after 30 minutes of operation at the following test conditions:

- Pure water (2 MΩ) at 20 psig applied pressure
- 100% recovery
- 77 °F (25 °C)

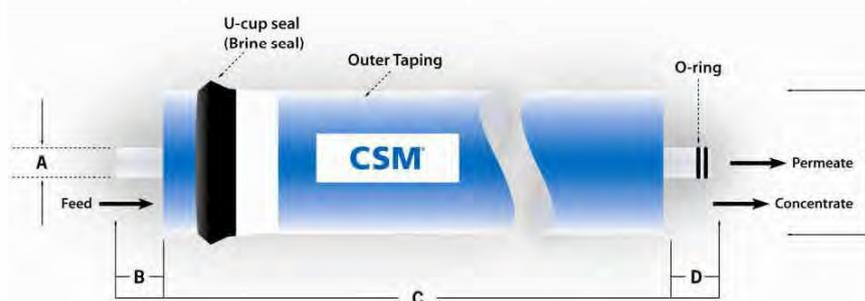

2. Dry type elements are vacuum leak tested using the San Diego Protocol.
3. Permeate flow rate for each element may vary but will be no more than 15%.
4. Dry elements are packaged in a polyethylene bag
 - α Wet elements are packaged in a polyethylene bag containing SB(4g/L) + HCl(0.51g/L) solution.

Membrane type: Thin-Film Composite
Membrane material: Polysulfone (PSF)
Element configuration: Spiral-Wound, Tape Wrapping

Contenitori per Membrane Residenziali

1,8" - 2"

- In polipropilene, di colore bianco;
- Con attacchi 1/8" NPT F;
- Pressione massima 125 psi (8,6 bar);
- Con doppio o-ring di tenuta;
- Sede tubo permeato diametro = 0,67";
- Dimensione nominale 1812 - 2012.

CODICE	
DE010	

Membrane abbinabili a catalogo:

- Membrane CSM residenziali 1,8" e 2" a catalogo, vedi schede 10-01-01-IT, 10-01-02-IT, 10-01-03-IT, 10-01-04-IT, 10-01-07-IT e 10-01-08-IT.

Clips per contenitore membrane residenziali 1,8" - 2"

- In PP;
- Di colore bianco.

CODICE	
DE034	

2,8" - 3"

- In polipropilene, di colore bianco;
- Con attacchi:
 - Ingresso, permeato e scarto 3/8" NPT F (usare i raccordi dritti AV153 o a gomito AV159);
- Pressione massima 125 psi (8,6 bar);
- Sede tubo permeato diametro = 0,67";
- Dimensione nominale 2812 - 3012.

CODICE	
DE007	

Membrane abbinabili a catalogo:

- Membrane CSM residenziali 2,8" a catalogo, vedi scheda 10-01-02-IT e 10-01-05-IT.

Clips per contenitore membrane residenziali 3"

- In PP;
- Di colore bianco.

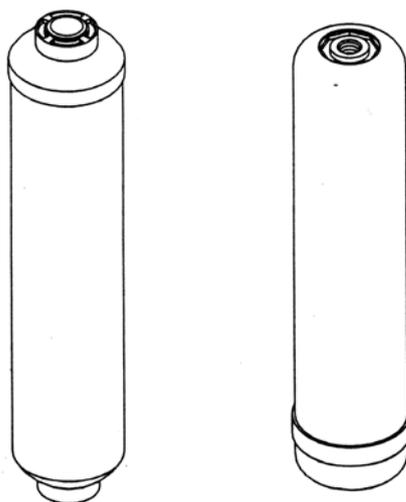

CODICE	
DE006	

Filtri In-Line

- Ideali per la filtrazione dell'acqua ad uso domestico;
- Con attacchi ¼" NPT F;
- Pressione massima pari a 100 psi (7 bar);
- Temperatura massima pari a 35°C;
- Conformi al D.M. n.174 del 06/04/2004 per materiali idonei al contatto con acque destinate al consumo umano.

DE101	Membrana speciale 50 GPD	
DE102A	Cartuccia prefiltro sediment / carbon block	
DE103	Cartuccia GAC postfiltro	

Pompa Permeato per Osmosi Residenziali

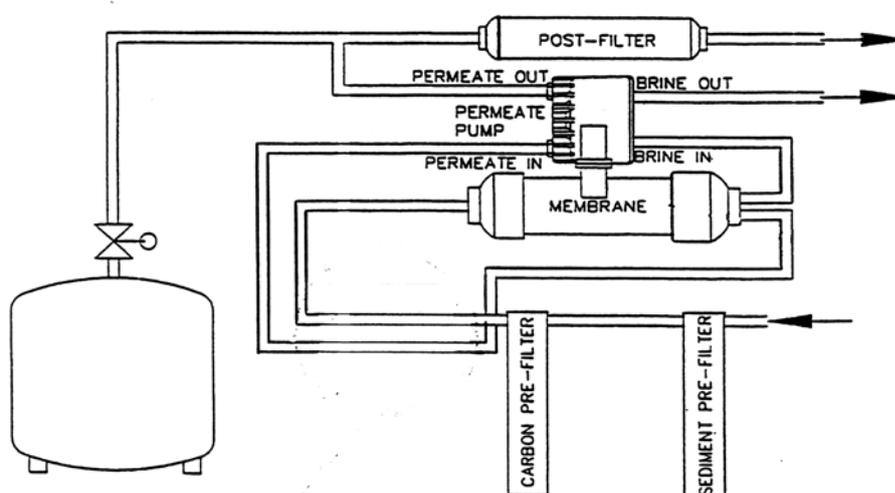

- Pompa meccanica, senza alimentazione elettrica;
 - Utilizza l'energia dell'acqua di scarico del sistema osmosi per aumentare la pressione operativa netta sulla membrana, eliminando gli effetti negativi della contropressione che si crea sulla membrana man mano che il serbatoio di stoccaggio si riempie;
 - Adatta per sistemi osmosi domestici con serbatoio di stoccaggio pressurizzato e membrana da 35 a 100 GPD;
 - In grado di migliorare fino a 5 volte il tasso di recupero del sistema, riducendo il consumo d'acqua e riducendo il tempo di riempimento del serbatoio di stoccaggio;
 - Elimina la necessità della valvola shut-off.
- In polipropilene / EPDM;
 - Pressione massima di esercizio pari a 6,8 bar;
 - Con attacchi per tubo ¼";
 - Portata massima allo scarico pari a 0,8 l/min.

CODICE	
DE120	

Schema tipico di installazione

ATTENZIONE

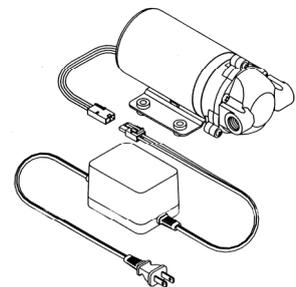

Montare la pompa in orizzontale con le uscite in alto per evitare di intrappolare aria.
Il flow restrictor sul concentrato deve essere posizionato prima dell'ingresso alla pompa.

- Prodotti nell'Unione Europea (Italia);
- Ideali per sistemi osmosi inversa e filtrazione domestici;
- Adatti per cartucce filtranti standard di lunghezza 10"
- Altezza totale 325 mm;
- Teste staffabili singole, doppie e triple in PP rinforzato di colore bianco;
- Vaso in PET trasparente o di colore bianco, O-ring in EPDM;
- Attacchi ingresso-uscita ¼" NPT F;
- Completi di valvola di sfiato;
- Pressione di esercizio massima pari a 8 bar;
- Range temperatura di esercizio da 4 a 45°C;
- Conformi al D.M. n.174/2004 per materiali idonei al contatto con acque destinate al consumo umano;
- Conformi al D.M. n.25/2012 "Disposizioni tecniche concernenti apparecchiature finalizzate al trattamento dell'acqua destinata al consumo umano";
- Conformi alla certificazione sanitaria ACS (per la Francia);
- Abbinabili alle sotto riportate staffe singole doppie o triple (queste ultime ideali anche per l'installazione 2+1), complete di viti per il fissaggio.

Flow Restrictor Linear Type

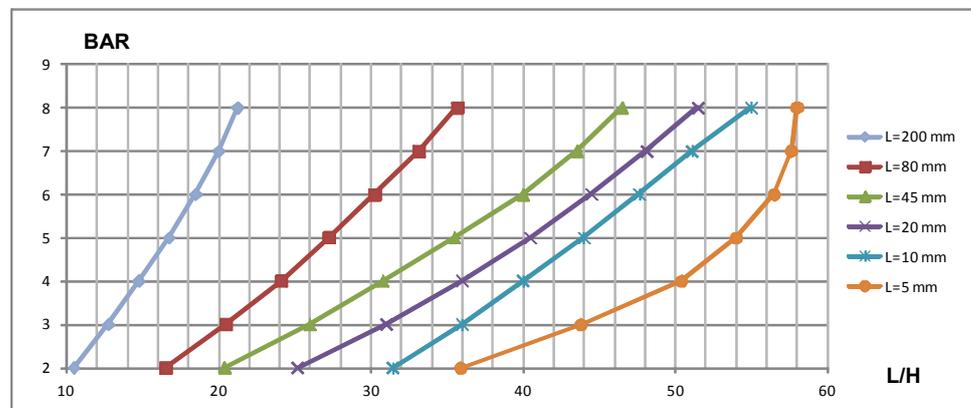

- Sistema di Regolazione Flusso a capillare per inserimento su tubo diametro ¼" (Øe=6,35 mm);
- Fornito in lunghezza standard 200 mm e modificabile secondo necessità come da grafico allegato;
- Materiali inserto e tubo capillare rispettivamente in PP e PE;
- Pressione di esercizio da 2 a 8 bar.

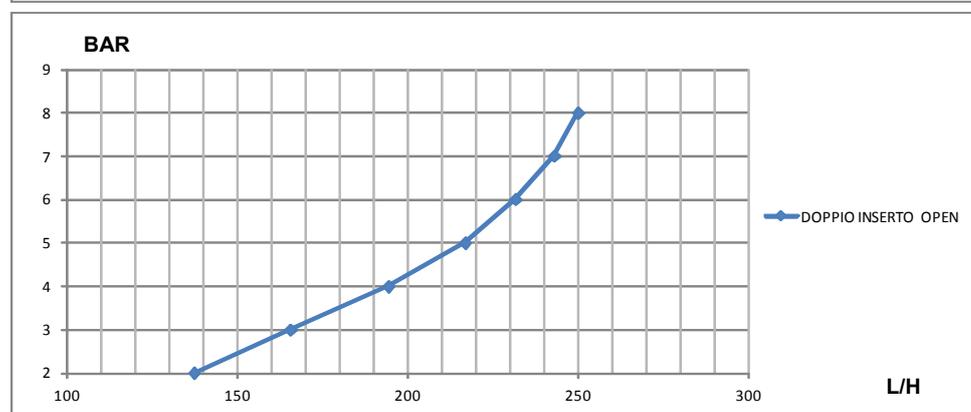

ITEM	DESCRIZIONE	CODICE	
1	FLOW RESTRICTOR LINEAR TYPE; LG = 200 MM	DE122	
2	INSERTO FLOW RESTRICTOR FRT-14P	DE124	
3	TUBO CAPILLARE ROTOLO 25 M	DE125	
4	FLOW RESTRICTOR JACO DOPPIO INSERTO OPEN	DE123	

ATTENZIONE: è indispensabile che il taglio del capillare sia netto e il tubo perfettamente circolare (aiutarsi eventualmente con un punteruolo per ripristinare la forma circolare), in caso contrario il valore di portata può essere notevolmente alterato. Rispettare la direzione del flusso così come indicato nella foto 1.

Flow restrictor linear type

Flow restrictor Jaco ¼" doppio inserto open

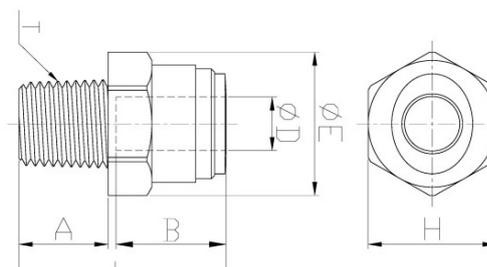

- Adatti per la realizzazione di sistemi domestici di filtrazione o osmosi inversa;
- Progettati per acqua, applicazioni alimentari e aria, ma possono essere anche usati con gas selezionati, vuoto e altri liquidi;
- Conformi al D.M. n.174/2004 per materiali idonei al contatto con acque destinate al consumo umano;
- Conformi alla certificazione sanitaria ACS (per la Francia);
- In resina acetilica di colore grigio, non tossica e approvata dalla NSF;
- Pressione massima 16 bar a 25°C.

DH023	1/4"	3/8"	20,0	11,5	20,2	21,5	19	34,2	

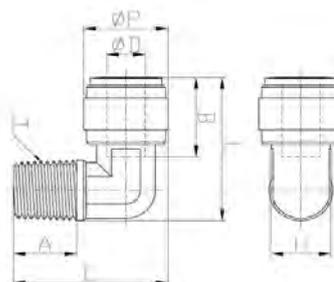

- Adatti per la realizzazione di sistemi domestici di filtrazione o osmosi inversa;
- Progettati per acqua, applicazioni alimentari e aria, ma possono essere anche usati con gas selezionati, vuoto e altri liquidi;
- Conformi al D.M. n.174/2004 per materiali idonei al contatto con acque destinate al consumo umano;
- Conformi alla certificazione sanitaria ACS (per la Francia);
- In resina acetale di colore grigio, non tossica e approvata dalla NSF;
- Pressione massima 16 bar a 25°C.

Sistema a osmosi inversa PRF-RO

- Perfetto per l'utilizzo domestico, ma anche per molteplici applicazioni commerciali;
- Compatto e affidabile, soddisfa al meglio i requisiti delle imprese di piccole e medie dimensioni;
- Non occorre alcun serbatoio di accumulo;
- Funziona con la pressione della rete idrica;
- Non necessita di pompe, né di elettricità;
- Grande facilità di installazione mediante attacchi ad innesto rapido;
- Minima manutenzione (sostituzione delle cartucce facile e veloce);
- Costituito da n.1 Pre-filtro a carbone attivo, n.2 membrane osmotiche RO e n.1 Post-filtro a carbone attivo.

CONDIZIONI DI ESERCIZIO	MINIMO	MASSIMO
Pressione in ingresso	2,8 bar (40 psi)	5,5 bar (80 psi)
Temperatura in ingresso (°C)	4	38
TDS in ingresso (mg/l)	50	2.000
Durezza in ingresso (°F)	0	20
Cloro in ingresso (mg/l)	0	1,0
Ferro in ingresso (mg/l)	0	0,1
Manganese in ingresso (mg/l)	0	0,05

Reiezione salina minimo 90%, media 93%

DIMENSIONI DI TUBI/RACCORDI	
Tubo d'ingresso (trasparente)	1/2"
Tubo del concentrato (di colore nero)	3/8"
Tubo del permeato (di colore blu)	3/8"
Tubo di scarico (di colore rosso)	1/2"
Attacco tubo di scarico	3/8" o 1/2"
Post-filtro a carbone attivo	Attacchi a disinnesto rapido da 3/8"

Dati prestazionali relativi a filtri/membrane:

Tipo di filtro	Lunghezza (mm)	Diametro (mm)	Portata (lpm)	Portata (gpm)	Durata media (mesi)
Pre-filtro a carbone attivo	432	74	14,20	3,75	6 (o 19.000 litri)
Elemento RO	476	80	(*) 0,95	(*) 0,25	24 ÷ 48
Post-filtro a carbone attivo	254	51	2,80	0,75	6 (o 19.000 litri)

(*) @ 3,44 bar T=25°C 750 mg/l NaCl 25% recupero 1 ppm Cloro inlet
