

# COUPON PROMO

CP03-20-06

Dear Customer,

we spent much time these past weeks selecting a range of other components to offer with strong discount in this crazy moment of Covid19. What all that research and scrutiny of spec sheets showed us is that **MWG Vertical Filters, Flowmeters, Conductivity Probes** and **Solenoid Valves** are a fantastic choice for anyone looking RO accessories with a very cheap price. This promo, **with others already in force**, is a great opportunity for some of you who do not know us, to experience what mean to work with EUROTROL. Not to mince words, we do not like to feature, discuss, promote or flash sales. We granted this coupon, with this one presented to Customer Service you will receive up to 70% discount on many items on promotion if on stock.

## Promo Details:

- Save up to 70% discount on these products and many others on different promo.
- Many products available on stock but subjected to prior sales.
- Hard discount on some products if not available on stock.
- Note that, on other promo, shipping could be free of charge for orders over 1.500 €.

Discover which promo allow this option taking contact with us on [eurotrol@eurotrol.it](mailto:eurotrol@eurotrol.it) or our Area Manager.
