

**ANNOUNCEMENT OF BLFC CHANGE ON RUNXIN VALVES F69P - "Y" TYPE**

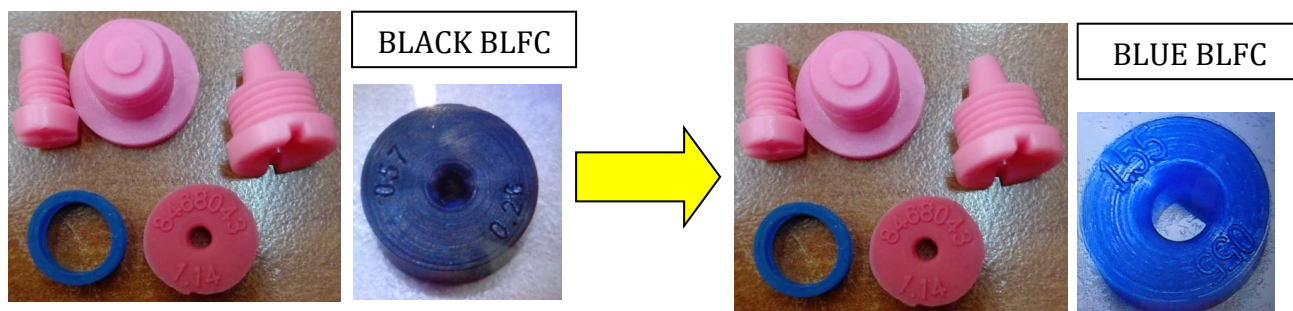

Dear Customer,

we inform you that Runxin manufacturer proceeded to modify injector-BLFC coupling for valve whom in subject with PINK injector configuration.

So starting from next delivery following valves:

RF69P1Y - RF69P3Y - RF69P3Y/F70BL

will be supplied with PINK injector mounted (as usual) but with BLUE DLFC #8468055 instead of BLACK BLFC # 8468057.

**ORIGINAL COUPLING**

**NEW COUPLING**

The cause of such modification was to shorten the brine filling time and at the same time save some water going to the drain (during brine filling).

As blue BLFC #8468055 has flow rate about 7 times more than black BLFC #8468057 (5,6 l/min against 0,83) we recommend to scale back refill time accordingly.

**However additionally to new configuration indicated above black BLFC will be supplied too.**

Runxin manufacturer confirmed all valves that were delivered since implementation of the change are working properly and they do not require modification / change of installed BLFC ("..057").

Our Technical Dept. remain at your disposal in case of need.

Best regards.

Settimo Milanese, October 26<sup>th</sup> 2020
